### The Editor's Column

by: Warren Lieuallen

---

This month's issue brings you quite a bit of informative, if not fantastically exciting material (how's that for an enthusiastic lead-in?!). However, as I was surprised by the interest expressed by the members present at our January meeting in a listing of the contents of our Disk Library, I decided to "go all the way", and give you a complete Table of Contents for both the Disks of the Month and our newsletter.

Despite its success and acceptance, I've departed from our now standard "booklet" style of printing. This is because this issue was photocopied, rather than offset printed as we've done in the past. You will also notice (or have already noticed, depending on whether you read this editorial first or last {if at all!}) the many different print styles present in the issue of Fuji Facts. There is a method to my madness. Trust me, you need to see all these different kinds of type, printing and layout.

ACEC needs to re-structure Fuji Facts, for a number of different reasons as discussed at the last few meetings (and if you'd come, you'd know what I was talking about!). As a part of this re-structuring, I've included a *very important* User Survey towards the back of this issue. Please (**PLEASE!!**), remove this page, take a few minutes to fill it out, and return it to me. There are going to be some changes made; if you'd like to have some influence in these changes, please help me by letting me know what you think. Thanks.

One of the minor changes that I'd like to announce right now has to do both with the method that I use to print Fuji Facts, as well as the material you read in it. After toying around with a number of different programs on several different computers (the Atari XL, Atari ST and IBM), I've decided to take a crack at

designing my *own* desktop publishing system! I'm planning on including an on-screen (software-driven) eighty column display, dynamic double column editing, and a "WYSIWYG" GEM-like environment. Don't get too excited, though — I'm planning on writing it in Action!, for the Atari 8-bits, and will structure it specifically for formatting and printing Fuji Facts (It's not going to be a Publishing Partner clone or anything even close, for heaven's sake! I've probably bitten off more than I can chew.). If there is any interest, I would be happy to run a monthly column dealing with the program's development and explanation of Action! programming along the way. Any takers?

The next few ACEC meetings are really going to be something special. This upcoming meeting (March 14th) will be devoted to a demonstration of Publishing Partner by Larry Mendel. Anyone with any interest in graphics, the ST or desktop publishing won't want to miss this one! Then, next month's meeting (April 11th) has been scheduled as a "Do Your Own Thing" meeting, where we will feature demonstrations of programs written by our very own members! Plan on coming out and seeing all of our hidden talent! Or better yet, bring some of your programs and show off *your* hidden talent!

# Atari Computer Enthusiasts of Columbus

since 1982

This newsletter is written and published monthly (except December) by the Atari Computer Enthusiasts of Columbus (ACEC). ACEC is an independent, non-profit organization interested in exchanging information about any and all Atari Home Computer Systems.

Our main meetings are held on the second Monday of each month at 7:15 p.m., at DeSales High School (on Karl Road, just south of Morse Rd.), and are open to the public. Other Special Interest meetings are held as announced at the main meeting.

Dues are \$12.00 per year, and entitle members to all club benefits (Newsletter, Disk of the Month, Publications Library, SIG meetings, group discounts at selected area merchants, etc.).

Fuji Facts welcomes contributions of articles, reviews, editorials and any other material relating to the Atari computers, or compatible hardware devices and software packages.

ACEC is not directly affiliated with the Atari Corporation; "ATARI"™ and the "Fuji"™ symbol are registered trademarks of the Atari Corporation. All other trademarks, copyrights and service marks are registered with their respective owners.

The statements expressed in this newsletter are solely the opinions of the authors, and do not necessarily reflect those of ACEC, its officers or its members. Material contained in this newsletter may be reprinted provided credit is given to both Fuji Facts and the author(s).

The masthead of this month's newsletter was printed with a Star SG-10 dot matrix printer, using TypeSetter 130. The newsletter itself was printed with a Hewlett Packard LaserJet series II laser printer in Times Roman 12 point, using Word Perfect 4.2 and Ventura Publisher on a 1 meg IBM Model 80.

# DAISY DOT II

## PUBLIC DOMAIN SOFTWARE NEAR LETTER QUALITY EMULATOR

by Roy Goldman  
reviewed by Dr. Warren Lieuallen

Many of you are already familiar with the Daisy Dot Near Letter Quality Emulation program. This public domain program has appeared on most users' groups' disks over the past six months, and has received kudos from everyone who has seen it. In short, this program allows any Epson-compatible or Star printers to achieve "near letter quality" text printing, in one of several different, user-definable fonts.

While most of the newer dot matrix printers come with a built-in NLQ font, this program frees you from its limitations of spacing and appearance. Daisy Dot fonts are proportionally spaced (the "i's" are skinny, and the "M's" are wide), and the characters can take any form and shape you desire. A font editor was supplied with the program, along with five pre-defined fonts.

There are prices to pay for all this flexibility, of course. Daisy Dot requires ASCII files, already pre-formatted and ready to dump to the printer (most word processors are able to provide these ASCII files easily). And because Daisy Dot actually prints the file as graphic data, the printing process is rather slow (although fairly comparable to the speed of most printers' NLQ modes). These are minor limitations, however, and are more than offset by the advantages allowed by this professional quality program.

Nice though it is, there have been suggestions for improvements and modifications. One user went so far as to write his own program (Which he unfortunately chose to originally title "Daisy Dot II". This program has since been renamed "Dot Magic"), incorporating a few additional features. For the ultimate in ease of use, and flexibility, though, the definitive Daisy Dot II program is now the obvious choice.

Roy has really outdone himself this time. While Daisy Dot was good, Daisy Dot II is truly fantastic. I honestly cannot give this program (and the programmer) enough praise! It has been totally re-written in C (the original was in compiled Turbo BASIC), the user interface has been upgraded, and many new commands have been added. Roy remains available on CompuServe and GENie, and has always been very helpful.

One of Daisy Dot II's most unusual features is its documentation. Included on the disk is a set of files which contain all the documentation,

in a format ready for Daisy Dot II to print. This manual, which is 24 pages long, is one of the best I have ever seen, for any product. It includes an introduction to the Daisy Dot II system (which consists of the main printing program, the new font editor, a font utilities package, and a graphics support program), examples of the 14 fonts provided, instructions on preparing the ASCII file with most popular word processors, and clear and concise examples of all of Daisy Dot II's commands. These examples include both the precise syntax to include in your file, as well as a print-out of the resulting output. After a unique "question and answer" section, the manual concludes with a one page "Quick Reference Guide".

As an example of the output of Daisy Dot II, this review was printed on my Star SG-10 printer, using the Roman font. In my own set-up, I have accumulated 21 different fonts, and have designed several myself. I use TextPro as the word processor, running from the SpartaDOS 192K RAMdisk. In this way, I may switch back and forth between Daisy Dot II and TextPro very quickly, and with no disk switching. This system is not only quite convenient, it is also completely public domain!

The commands supported by Daisy Dot II include:

- the ability to change fonts "on the fly"
- left or right margin alignment, and right justification
- automatic line centering, in any font
- double width printing, in any font
- underlining of any font
- proportional tabs
- user selected graphics densities, and character spacing
- ability to include graphics (multiple sizes) in a text file
- "chain" multiple files together, to allow "unlimited" text size
- AND MORE!

All of these commands are accessed from within the text file itself by preceding them with a backslash character ("\"). The syntax is sensible (most commands are abbreviated by their first letter), and easily mastered. A number of the commands can be combined, providing even more flexibility.

The usage of Daisy Dot II could not be simpler. Once you have created an ASCII with your favorite word processor, you simply boot Daisy Dot II and follow the prompts. You'll be asked for which font you'd like to use, and which file to print. A menu of global commands is then presented, which includes, margins, justification, pages to print, spacing and density, etc. You may alter any of these from the menu, if you like. Press START, and your document is printed!

I have had the Daisy Dot II system for more than a month now, and have still not used it to its fullest potential. The flexibility and usefulness of this program rivals any commercial software available, and its uses are limited only by the imagination of the user. I strongly urge you to contact your local users' group to obtain a copy, and to support Mr. Goldman with a small donation for his work. You won't regret it!

Table of Contents  
ACEC Newsletter (Fuji Facts as of 1/1/87)

Compiled by Warren Lieuallen

**Volume 1, Number 1**

Editor's Notes - B. Eckert

Information Sources

Questions & Answers

Reviews of Starbase Hyperion, Raster Blaster, Sammy the Sea Serpent and Crossfire - D. Stellmack and B. Eckert

Interact Version program - S. Cook, Atari

Translation by B. Borghese and D. Stellmack

Membership List

**Volume 1, Number 2**

Editor's Notes - B. Eckert

The Atari Message and Information System (AMIS) - D. Stellmack

Your Atari Computer review - M. Coverdill

Full View 80 review - D. Stellmack

Bits & Bytes

Keyboard Speaker program - B. Borghese

Hayes Smartmodem review - D. Stellmack

**Volume 1, Number 3**

Editor's Notes - B. Eckert

The Atari Connection

Preppie review - S. Leemon

Useful Hardware Modifications - M. Crispin

Symtec Light Pen review - M. Dubin

**Volume 2, Number 1**

Editor's Notes - B. Eckert

Disk Menu Labels program

Galahad and the Holy Grail review - M. and J. Blue

Wico Command Control Joystick review - J. Blue

Convert Your Atari 810 For Fast Formatting

Wico Command Control TrakBall review - D. Stellmack

Starfighter Joystick review - B. Eckert

A 48K Upgrade for Your Atari 400 - C. Buchholz

Memory Test program

Accessing Atari Post from DataTrac - D. Stellmack

Synassembler - D. Stellmack

**Volume 2, Number 2**

Editor's Notes - B. Eckert

Wizard of War review - M. Kordos

Telelink I, Download, Chameleon, T-Smart, T.H.E. Terminal and Xmodem version 4.2 review - D. Stellmack

Modifying T-Smart for Use with the Hayes SmartModem - D. Stellmack

Modem Software Quick Reference Table

A Primer on Using A Disk Drive with Your Atari 400 - R. Lyons

The Amodem, Xmodem, CP/M Saga - D. Stellmack

Eastern Front review - M. Hendershot

Xmodem Tutorial - D. Stellmack

410 Rejuvination - N. Knapp

**Volume 2, Number 3**

Editor's Notes - B. Eckert

What's New

Character Set Generator program - J. Blue

The Tax Advantage review - D. Noble

Micro Painter Slide Show program - D. Stellmack

Add a Keyboard to Your Atari 400 - K. Michal

## ACEC Membership Survey -- Fuji Facts Newsletter

In order for me to make Fuji Facts the best newsletter that it can be, and to serve your needs, I'd very much appreciate it if you'd take a few minutes to fill out this survey. Please either mail it to me (address inside front cover), or give it to me at the next meeting. Thank you very much.

Depending on the final results (which I will put in a future issue of Fuji Facts), some of these options may or may not actually happen. Some of them take both time and money (neither of which I am willing to supply in large quantities!). However, if I know what your ideal newsletter is, I'll do my best to give it to you!

1. Printing - For the past year or so, this newsletter has been professionally printed. While this is quite nice, it is also fairly expensive. In your opinion, should this printing continue, or shall we switch back to photocopying (the quality of the final product is also dependent on several other factors [see questions 2 through 4])?

professional printing, as in the past year  
 photocopying, as in this issue

2. Format - When I began as newsletter editor, I instituted the "booklet" format for Fuji Facts. While more "polished" in appearance, and better suited to mailing, it is smaller, and more difficult to keep "filed" in notebooks. Should we continue with the 8.5" by 7" booklets, or return to the stapled 8.5" by 11" sheets?

booklet, as in the past  
 single sheets, as in this issue

3. Style - I also began printing the newsletter in a double-column, justified margin format. I also feel that this improves the appearance and readability of the newsletter. However, it is more difficult to prepare and format (and has "forced" me to use an IBM the last few months). Should this double-column format continue, or shall I just print the material "normally" on the page?

double-column, as in the past  
 single-column, as in this survey

4. Type - Initially, Fuji Facts was composed on a dot matrix printer, in draft mode. I later acquired a daisywheel printer, and used both elite (12 cpi) and condensed (15 cpi). I have since switched to a laser printer, using a larger 12 point font in elite pitch. There are now several enhancements available for the Atari computers (see my review of Daisy Dot II) which I could use as well. Should I: use a dot matrix printer (in draft, enhanced or NLQ); use the daisywheel printer; use the laser printer?

dot matrix       draft okay (as in this survey)  
                 some kind of "bold face" needed  
                 some form of NLQ (see Daisy Dot II review)  
                 include graphics and article "headers"  
 daisywheel (as in Newsletter Directory)  
 laser printer (as on the inside cover)  
 laser printer with desktop publishing "frills", such as Publishing Partner or Easy Draw  
(as on the front cover)

5. Content - I've always tried to publish an independent newsletter (all material coming from our membership), with reprints from other sources only occasionally. Would you prefer to receive information from our club members exclusively, or do you appreciate numerous reprints from other clubs and Antic, Analog, CompuServe, GEnie, etc.?

ACEC only, as best as possible (see question 9)  
 generous reprints from all over, every time

6. Delivery - I also began mailing the newsletters to all members a week before the meetings, based on the good response to our "pre-meeting flyers". This mailing is also not cheap. Should we continue mailing all newsletters, or have them available for pick-up at the meetings (mailing copies not claimed)? Should we consider an extra fee (\$3.00/yr ?) for mailings?

- pick-up at meeting, with later mailing
- mail all newsletters before meetings
- mailing fee of \$ \_\_\_\_/yr okay

7. Frequency - As discussed at the meetings, one way to combat the problems of increasing expense and decreasing article submission is to switch to a bi-monthly publications schedule. Should Fuji Facts remain a monthly newsletter, or switch to fewer issues per year?

- Monthly (12/yr)
- Reduce to \_\_\_\_ issues per year

8. Money! - Another way to meet our expenses would be to raise extra revenue. Would you support an increased ACEC membership fee or an extra newsletter fee (\$5.00/yr ?) for non-contributors?

- Raise membership dues to \$ \_\_\_\_/yr (from current \$12/yr)
- Add newsletter fee of \$ \_\_\_\_/yr
- No extra charge tolerable

9. To be or not to be - In short, what should I do when I have little (or no) material to print?

- Skip that issue
- Publish a smaller issue
- Fill issue with older reprints, etc.

10. Suggestions - If you were the editor of Fuji Facts, what's the single most important change you'd make, and why? What's the best thing about Fuji Facts?; the worst?

Comments: (as much as you wish, please!)

## **Notice to Newsletter Editors:**

Please examine the listing of the articles contained in past issues of Fuji Facts. If any of them sound interesting (and I hope that at least a few will!), reprints are available upon request. Our policy is that all material printed in Fuji Facts may be freely reprinted in other clubs' newsletters, so long as credit to both the author and Fuji Facts is given.

To order back issues of Fuji Facts, contact the editor at the address given on the inside front cover.

## **Notice to Disk Librarians:**

As you leaf through our Disk of the Month listing, I'd like to remind you that all of these disks are available through our Disk Librarian. The price for ACEC members is \$5.00 per disk -- for users' groups' PD disk libraries, special terms are available. We are also interested in a one-for-one disk exchange program. For more information on any of the programs listed, or to order or exchange disks, please contact our Disk Librarian, at the address given on the inside front cover.

## **ACEC Bulletin Board System**

*The ACEC BBS, and its sister board, Pandora invite you to join us in experiencing some of the finest Atari-specific bulletins in Central Ohio. Both running under the Carina system, these boards have been customized by our sysop, Frank Seipel to allow a number of features not found elsewhere. The ACEC Databases are extensive, and constantly updated. We are an official regional Z-Mag bulletin board system. The national "Atari Network" message bases originated on the ACEC BBS, and feature messages from Atari computer users across the country. Both systems have 10 meg hard drives, brimming with some of the best public domain software to be found anywhere.*

*Both boards operate 24 hours a day, 365 days a year. Access is free, and open to all. We invite you to give them a call, at 614-471-8559 for ACEC and 614-471-9209 for Pandora (which also features a long-distance "call-back" service through PC Pursuit).*

*Give them a call—I think you'll be glad you did!*

An official Users' Group,  
the Atari Computer  
Enthusiasts of Columbus  
meets on the SECOND  
MONDAY of each month.  
The meetings are held at  
7:15 p.m., at De Sales  
High School on Karl Road.  
Meetings are open to the  
public, and consist of  
demonstrations and short  
tutorials of products for  
the Atari Home Computer  
Systems. Dues for ACEC  
are \$12.00 per year, and  
include a subscription to  
Fuji Facts, and more!
